

One Decision Can Shape our Future

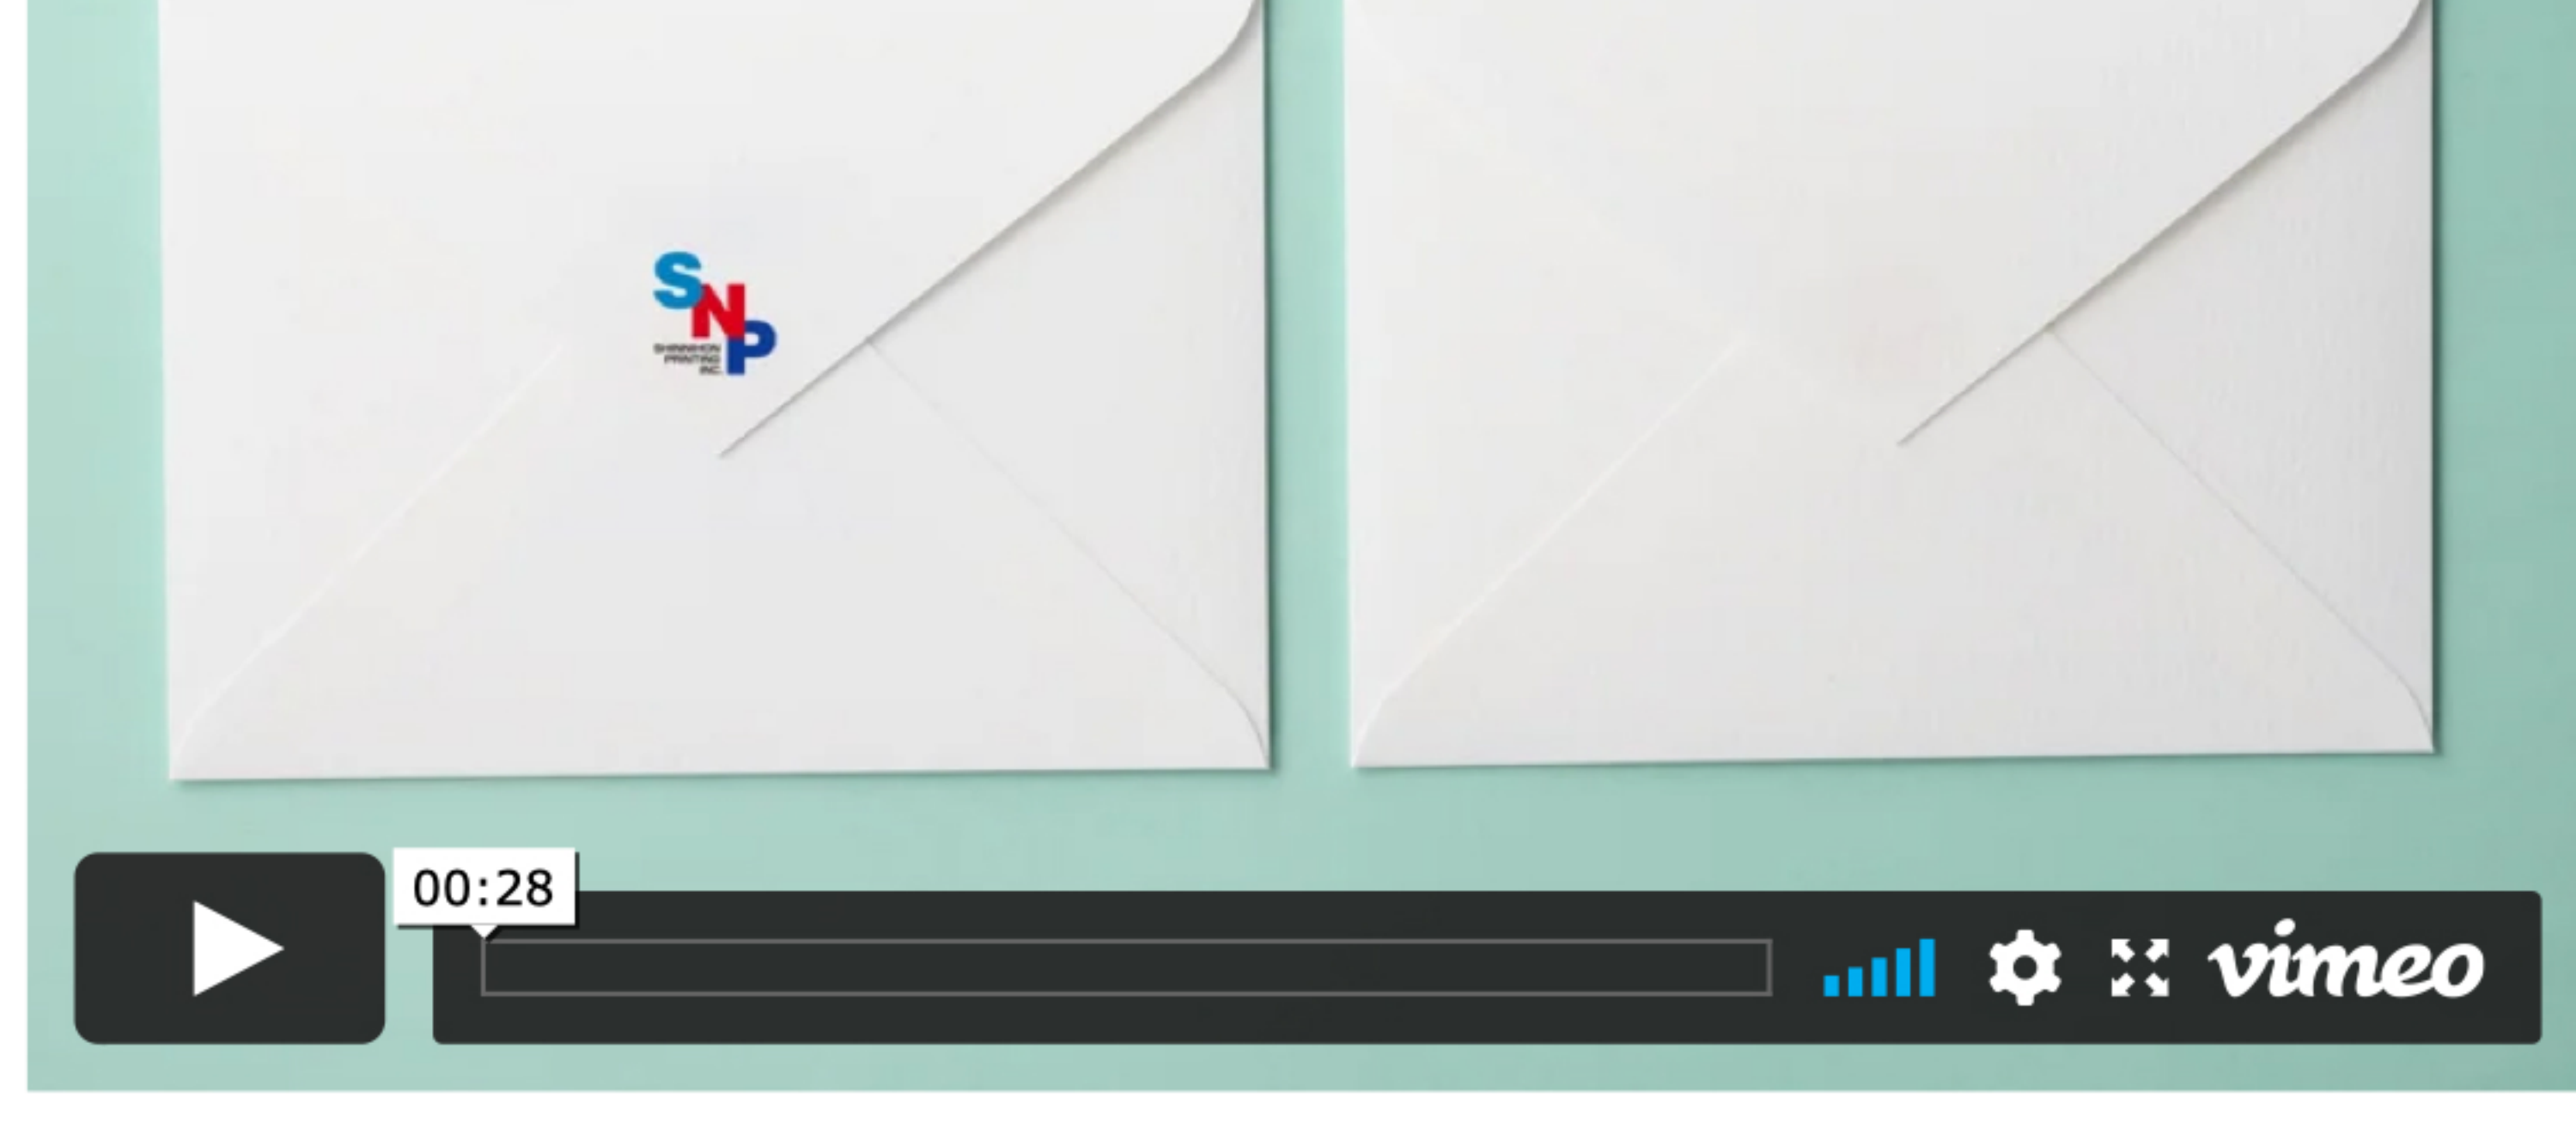

eliminating carbon emissions from roads, packaging, and operations, and digital content for the world's most prominent brands.

In order to protect the natural environment through sustainable business, we always choose actions that do not pollute the earth, such as eco-friendly environmental printing, CO2 reduction through the industry's largest amount of carbon offsets, and social contribution activities.

We are also passionate about making creative products that will excite the recipients of our products. Encouraging people to be excited by environmentally friendly products furthers our goal of preserving the natural environment.

Together with our partners, we will continue creating a sustainable and prosperous future based on excellence and delivered at the highest quality.
